Belt sanders are more powerful but should be used cautiously on hardwood to prevent excessive material removal.

Q2: How often should I replace the sanding pads on my Black & Decker sander?

A2: The frequency of pad replacement

depends on the intensity of use and the type of pad. However, as a general rule, replace sanding pads when they become clogged with dust or show significant wear, compromising their effectiveness. Inspect them regularly for even wear and tear.

Q3: Can I use a Black & Decker polisher on all types of flooring?

Q5: How do I clean my Black & Decker wet/dry vacuum after using it for a

flooring project?
