Example: A simple GEPscript to calibrate the GEP55:

```
...
```

```
calibrateSensor(sensor1,  
"standardSolutionA");
```

```
calibrateSensor(sensor2,  
"standardSolutionB");
```

```
verifyCalibration();
```

```
...
```

Regular calibration using the automated features and possibly custom scripts like the one above, is vital to maintain the accuracy of the GEP55. Failure to calibrate regularly can lead to inaccurate measurements and compromised data integrity.
