Installation and Wiring of Your Hampton Bay Flush Mount Light

Before starting any electrical work, always turn off the power at the breaker box. This is crucial for safety and prevents electrical shocks. Consult the specific instructions included with your Hampton Bay light fixture, as the wiring diagram may slightly vary depending on the model. However, generally, the process involves:

1. **Mounting the Fixture:** Securely attach the mounting bracket to the electrical junction box in your ceiling.
2. **Connecting the Wires:** Carefully connect the fixture's wires to the corresponding house wires (usually black to black, white to white, and ground to ground). Use wire connectors to secure the connections.
3. **Attaching the Fixture Cover:** Once the wiring is complete, attach the fixture's cover plate and glass shade according to the manufacturer's instructions.
4. **Testing the Light:** Turn the power back on at the breaker box and test the light to ensure it's working correctly.
