Think of your car like a finely tuned machine; regular servicing is the equivalent of lubrication and inspection to ensure optimal performance. Key Maintenance Tasks

- **Oil Changes:** Regular oil changes are crucial for engine health. Consult your owner's manual for the recommended oil type and change interval (typically every 3,000-5,000 miles). Using the incorrect oil can severely damage your engine.
- **Fluid Checks:** Regularly check and top off all essential fluids, including coolant, brake fluid, power steering fluid, and transmission fluid. Low fluid levels can indicate leaks or other problems.
- **Brake Inspection:** Inspect your brake pads and rotors regularly. Worn brake pads can significantly compromise your safety. Listen for any unusual squeaking or grinding noises from the brakes.
- **Tire Pressure & Rotation:** Maintaining proper tire pressure improves fuel economy and handling. Rotate your tires regularly to ensure even wear.
