Fats: Essential for Hormone Production and Nutrient Absorption

Healthy fats are not the enemy; they are essential for hormone production, nutrient absorption, and overall well-being. Choose unsaturated fats found in avocados, nuts, seeds, and olive oil. These fats contribute to satiety, helping you manage your appetite and avoid overeating. Limit saturated and trans fats found in processed foods, as these can negatively impact your health.

During Zumba (for longer sessions):

- For longer or more intense classes, consider having small sips of a sports drink or water with electrolytes to

replenish fluids and minerals lost through sweat.

Post-Zumba Recovery:

A protein smoothie with fruit, a Greek yogurt with berries, or a chicken salad sandwich are effective choices. This is the most important part of your *Zumba weight loss* or muscle-building journey.

Hydration: The Often-Overlooked Key

Hydration is crucial, especially during and after Zumba classes. Dehydration can lead to fatigue, muscle cramps, and decreased performance.
